

SCHOOL VISIT PACKAGE 2: L&D studio HAN and Radboud/HAN Teachers academy

By foot (approximately 3,8 walk in total during the day), lunch included

VISIT 1: Bachelor Learning & Development Studio L&D

Name of school	Han University of Applied Sciences
Address of school	Laan van Scheut 10
Short presentation of the school	<p>The <i>Hogeschool van Arnhem en Nijmegen (HAN)</i> is a University of Applied Sciences. HAN has 14 academies. The degree programs, research teams and professional field join forces to address a range of social issues. By collaborating, we offer our students the best of the best. And we come up with solutions that benefit us all.</p> <p>The School of Organisation and Development trains enterprising, inquisitive professionals. Professionals who are good at connecting people and networks. Each and every one of them makes a sustainable contribution to good work, healthy employees and economic growth.</p> <p>Home base for bachelor and associate programs Almost 4,000 HAN students are enrolled here in a full-time or part-time degree in the field of people and organization. They do this at associate degree or bachelor level. The School of Organisation and Development is their home base.</p> <p>You are more than welcome to visit the Bachelor Learning & Development in Organisations. Learning & development professionals always work with and for employees in organizations. Issues relating to learning & development can arise at the level of individuals, teams or organizations. Within our degree course, we currently work with three roles for learning & development professionals:</p> <ol style="list-style-type: none"> 1. The consultant, who provides advice and develops policy on issues relating to learning & development in organisations; 2. The instructional designer, who systematically and methodically designs and develops learning resources for various audiences; 3. The trainer & coach, who guides groups or individuals in the development of competencies. In practice, these roles overlap and reinforce each other.

Maximum number Of participants allowed by the school	20
School visit program	<p>Students from L&D, would like to take you on the L&D Student Journey. We have a unique way how we learn our skills during our courses and would like to show you how. Most importantly we would like for you to experience the way we learn yourself. During this Journey you will also become acquainted with Studio L&D, an informal learning environment where students and professionals learn from and with each other. Within the academy, each study program has its own studio with a communal meeting square next to it.</p> <p>Learning is the basis for everyone who wants to develop themselves in their profession or in their personal skills. We are exploring how people learn in the best way and we will show you how we do that in the context of our courses, the Student Journey and Studio L&D.</p> <p>Contact: Christel Vissers, Christel.Vissers@han.nl</p>

VISIT 2: Radboud/HAN Docentenacademie

Name of school	Collaboration makes us stronger: Radboud Teachers Academy en HAN School of Education
Address of school	Erasmusgebouw
Short presentation of the school	<p>The Radboud Teachers Academy and HAN School of Education collaborate in training teachers together with secondary schools, both in their own way. Radboud Teachers Academy is strongly committed to systematically expand and share knowledge of ways in which creativity can be cultivated in secondary education. HAN UAS trains Bachelors in Education (in full time and part time courses) to be enterprising, inquisitive and confident teachers. During this school visit we will show which ways there are to become that strong teacher in secondary education and how our collaborative approach 'Educating together' turns out in practice. 'Educating together' is a form of education where formal partnerships are created, that educate students based on a 50%-50%-principle. Half of the course time of the students is spent in practice and half at university (either Radboud or HAN UAS). In the past years HAN UAS and Radboud Teachers Academy built a strong network</p>

	<p>where intensive collaboration and guiding students and new teachers are key factors for success.</p>
<p>Picture of the school</p>	
<p>Maximum number Of participants allowed by the school</p>	<p>20</p>
<p>School visit program</p>	<ul style="list-style-type: none"> ● Welcome ● Tour at the Radboud Teachers Academy ● Presentation: How to become a teacher? ● Educating together: partnerships in Nijmegen region ● Conversation with: educators, secondary school coaches and student. ● Induction: Our view on the starting teacher and our role as educators within their training programs.
