

**UNIVERSITY OF APPLIED  
SCIENCES AND ARTS**

## **PXL University of Applied Sciences and Arts**

### **Department: Education**

Vildersstraat 5, 3500 Hasselt

Good education, one of the foundations of a prosperous society, relies on skilled teachers. They provide quality education every day.

Who are the best teachers? Ask students and you will get a clear answer: passionate, creative individuals with expertise. Our competency-based training programs emphasize this. We train skilled teachers who enjoy coming to school and whose students enjoy attending their classes.

To make your dream job a reality, our department offers a comprehensive range of programs for future kindergarten, primary, and secondary school teachers.

Future kindergarten and primary school teachers benefit from a broad range of courses where knowledge and didactics are integrated. In the final year, there is a wide variety of elective modules.

PXL-Education places a strong emphasis on internships. From the first year, students are in front of a class. They can count on intensive guidance and gradually become familiar with different types of schools.

We train teachers not just for tomorrow, but for the future. Students become familiar with modern didactic tools such as digital boards and tablets. Lifelong learning is more than a buzzword for us: we ensure that you are encouraged to keep developing. Even after graduation, you can turn to us to stay up to date with the latest insights.

### **Program:**

- Meeting with the dean of PXL-Education and short presentation about the mission and vision
- Workshop for visitors / attending a class
- Q&A with students and lecturers
- Tour at the campus of PXL-Education: tour authentic classrooms
