

"ACTION TEAM ON COVID-19 RELATED EDUCATION RESEARCH (ACO)"

ABSTRACT:

In April 2020 the Dutch Ministry of Education, Culture and Science (OCW) asked the Netherlands Initiative for Education Research (NRO) to create an overview of current COVID-19 related education research on predefined themes.

In this presentation the following topics will be addressed:

- A brief explanation of:
 - the questionnaire for researchers : The goal was to create an overview of the education research related to COVID-19. Researchers and education professionals can use this overview to collaborate on similar questions and reduce overlap; research funding bodies can spot gaps in current research and set out (new) funding lines.
 - the questionnaire for education professionals. The goal was to create an overview of COVID-19 related issues, knowledge questions and themes that are relevant to the professionals.
- An analysis of the questionnaires
 - What were surprising results? What were good suggestions?
 - What were lessons learned? Or lessons not (yet) learned?
 - How do we give this back to the professionals; planning of the dissemination.

PRESENTER:

Cedric van Drieberge (NL)
